

## Introduction

Cyber war has begun between corporations, governments, and countries with the rise in the number of cyber criminals and the consequences can be seen in everyday life. With the onset of sophisticated cyber-attacks, the need for advanced cyber security and investigation training is a mandate in the present day. If you or your organisation requires the knowledge or skills to identify, track, and prosecute the cybercriminals, then this is the workshop for you.

This workshop helps participants to excel in investigating cyber crimes, digital evidence acquisition, handling and analysis in a forensically sound manner. Acceptable in a court of law, these skills will lead to successful prosecutions in various types of security incidents such as data breaches, corporate espionage, insider threats and other sophisticated cyber crimes.

## Key Takeaways

- Tracking and investigating different cyber crimes
- Applying analytical methods in the digital forensic investigation
- Handling and analysis of crime in a forensically sound manner
- Retrieving electronic documents that are intentionally hidden, password-protected, encrypted or deleted
- Ensuring successful prosecutions in various types of security incidents
