

## Introduction

Malaysia's ambition to be a developed nation by 2020 entered its final phase with the 11th Malaysia Plan. The 11th Master Plan identified six thrusts to help Malaysia stay ahead of the challenges and opportunities and six game changers which are innovative approaches to accelerate Malaysia's development. One of the six thrusts is accelerating human capital development. In today's VUCA (volatility, uncertainty, complexity and ambiguity) world, skilled human resources is the most valuable asset.

The Public Sector HR Management aims to enhance the delivery and value of human resource in public sector beyond papers and processes.
