

3rd Annual Information Security Summit

Reducing Vulnerabilities, Securing Business

“Know thy self, know thy enemy. A thousand battles, a thousand victories.” Sun Tzu

3rd & 4th September 2013, The Royale Chulan Hotel Kuala Lumpur

Overview

Cybercrime is one of the fastest growing areas of crime. More and more criminals are exploiting the speed, convenience and anonymity that modern technologies offer in order to commit a diverse range of criminal activities. These include attacks against computer data and systems, identity theft, the distribution of child sexual abuse images, internet auction fraud, the penetration of online financial services, as well as the deployment of viruses, Botnets, and various email scams such as phishing. According to Sophos Security Threat Report 2013, Malaysia is the sixth most vulnerable country in the world to cybercrime, in the form of malware attacks through the computer or smartphone. Based on the statistic from Cyber Security Malaysia, the highest reported cybercrime was fraud, followed by cyber invasion attempts, spam, denial of service, content-related offences, malicious code and cyber defamation. The ‘3rd Annual Information Security Summit’ will bring together key corporate security decision makers to discuss the strategic priorities, potential risk factors and threats thus providing you with inspirational guidance on how industry experts respond to these denunciatory challenges.

Take away with you skills and strategies on:

- Gaining an insight into the latest IT incidents
- Understanding how nations’ premier companies are improving their cyber security
- Reviewing your level of security and readiness for penetration
- Aligning your security strategy with critical business and corporate goals
- Obtaining the latest update on state of art in digital treats in cyber underground
- Utilizing the full potential of cyber security
